I am an excited and motivated Frontend React Developer looking for an internship to apply my skills in building websites and web apps. I want to learn from experienced developers, work on interesting projects, and grow in front-end development.

PROJECTS

01. CareOX – (Volunteer Management Website –Full Stack)

Main Features:

❖Users can create, update, and delete their volunteer posts, showcasing their need for volunteers.

❖Implemented password and email-based authentication for user login and registration, ensuring secure access to the website's features.

❖Users can volunteer for others' posts, showing interest in contributing to various causes.

Using Technology

React.js, Node.js, MongoDB, Express.js, JWT and Javascript.

Live Site Link   Github Link(Client)   Github Link(Server)

02. Artistic- (Art & Craft Store – Full Stack)

Main Features:

❖Dive into various art & craft categories, including painting and drawing, sculpture and modeling, textile arts, paper crafts & glass art, ceramics and pottery, and jute & wooden crafts, each offering unique and inspiring creations.

❖Securely register and log in to access personalized features such as adding craft items, viewing your art & craft list, and updating your profile.

❖Explore various painting and drawing options, from landscape paintings to portrait drawings, watercolor art to oil paintings, charcoal sketching to cartoon drawings.

Using Technology

React.js, Node.js, MongoDB, Express.js, JWT and Javascript.
